

## Max Hoffmann Group

### Max Hoffmann GmbH & Co

The Max Hoffmann Company was founded in 1907. The many new buildings it has contributed to the Hamburg city-scape since then are defining features of the city's neighborhoods.

The company's spectrum of activity spans from infill development in existing urban areas to large-scale new urban development projects. The structures they produce include high-quality residential, commercial and public buildings.

The company consists of three autonomous departments: New Building Construction, Modernization and Repair. Max Hoffmann currently employs over 200 highly qualified employees. It carries out approximately 25 construction sites a year for a total turnover of about 75 million Euros.

### mh\_projekt . gmbh

#### Project Development

mh\_projekt is a multi-faceted service enterprise in the area of real estate development. Our aim is to transform existing urban contexts into extraordinary places. The scope of our work reaches from infill development on single properties to comprehensive urban development concepts.

We link well-founded knowledge in the areas of planning and construction, project coordination and financing with a vision for the individual site. The result is objects that are striking in their urban context, architecturally attractive and economically viable.

#### Project Management

The MH Construction Contracting Company was formed in 1987 as a response to increased demand for competence, expert knowledge and reliability in the construction field. The vast range of services offered by mh\_projekt Project Management today guarantees a consistent management throughout all building phases. Intensive scheduling and cost controlling combined with implementation of highest quality are the core tasks of our experienced employees.

### MH Naturstein GmbH

The Corporation for Concrete and Natural Stone Work was formed in 1989 as an independent specialized operation of the Max Hoffmann Company.

Since then 300 residential, commercial and public buildings have been constructed by the corporation.
